Description:

This classic commentary on Genesis 1-11 contains a thorough analysis of the text itself, and has a number of features that set it apart from many other Genesis commentaries: It defends the biblical creationist position: creation in six consecutive normal days, death resulting from Adam's fall, and a globe-covering Flood, and confusion of languages at Babel, and in the process it explains how the rest of the Bible interprets Genesis in the above straightforward manner. While skillfully documenting how interpreters throughout Church history have taught the above, and that long-age

death-before-sin views were a reaction to 19th-century uniformitarian geology, it also provides cutting-edge scientific support for the Genesis history. Importantly it demonstrates that all doctrines of Christianity begin in Genesis 1-11, and straightforwardly answers the commonest objections to a plain understanding of these crucial Genesis texts.

I do verse by verse expository preaching. To prepare myself for Genesis, I purchased 3 high-rated conservative commentaries that I researched online. I did this to glean from an array of sources. The Genesis Account was a fourth one I purchased, but was hardly mentioned in reviews and commentary lists. Now it has become my go to resource which I did not know would happen. Jonathan Sarfati not only shows scholarly exegetical considerations and stays with the literal recognition of a six day creation and a real worldwide Noah flood, but also weaves in information which meets and refutes the philosophy that the world must be seen through the Old Age influence lens of naturalists influencing Christians, instead of the other way around. He also touches on form and documentary philosophies in a way that brings out the most important considerations. So on p33 where he says It is primarily a history book he shows this to be true, and gives evidence to see it as accurate history at that. Unlike, for example one of the commentaries I bought which is The Book Of Genesis by Victor Hamilton which is touted as one of the best conservative commentaries on Genesis by a lot of folks, I have not found any disappointing surprises with Sarfatis work. I think of Hamiltons odd assertion on p. 53 under Problems In Interpretation; Hamilton wrote, And whoever wrote Gen. 1 believed he was talking about literal days. Now, over the last few centuries science has shown that it is absurd and preposterous to think that the universe was created in one week. But with Sarfatis information and insights, I see others like Hamilton making absurd and preposterous moves with such bold naturalist perspectives of scientific data, and then Sarfati quickly going for checkmate in his more carefully handled insights into what science has shown. Sarfati did the same with Hamiltons whoever wrote Gen. 1, making a strong case for the classic authorship of Moses. Whether your presupposition is long age, or short age--poetic or literal, a mixture, or an I dont know, I recommend getting this book. It has valuable insights to add to your thinking process.
